

Courses covering the breadth  
of Street Works knowledge

# Meet the Team

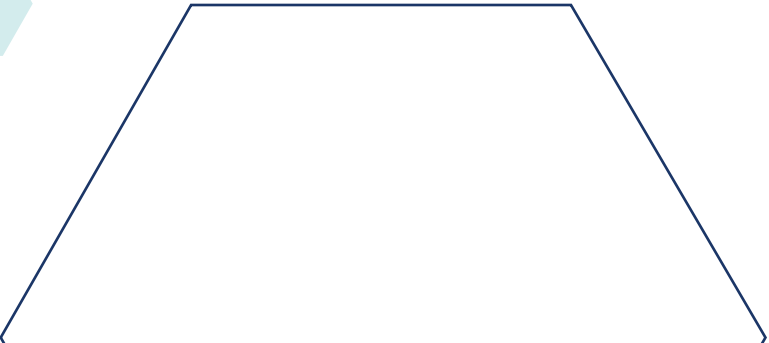

**Liz Rosling**  
Street Works and Training Director    [liz.rosling@absstreetworks.co.uk](mailto:liz.rosling@absstreetworks.co.uk)

Liz Rosling has worked in Street Works for over 20 years. She oversees a team of more than 70 staff, supporting over 30 clients in all aspects of back-office planning and Street Works. Liz also leads a team of trainers who provide comprehensive training on all aspects of Street Works for both back-office and operational roles.

She is dedicated to ensuring that everyone involved in Street Works is fully trained, knowledgeable, and understands the importance of their roles, as well as consistently staying updated on legislation to maintain a fully compliant workforce, both in the office and on-site.

Liz is committed to providing a complete, end-to-end Street Works support service, ensuring our clients receive the safest and most efficient service while continuously enhancing performance.

**Ken Simpson**  
Street Works Trainer    [ken.simpson@absstreetworks.co.uk](mailto:ken.simpson@absstreetworks.co.uk)

An experienced and qualified Street Works professional who has been heavily involved in managing and improving compliance in line with legislative requirements. A highly knowledgeable individual with a strong understanding of all areas of Street Works.

In his role, he will be using his knowledge to support the delivery of our accredited training from EUSR, CABWI, and City & Guilds. Ken trains and supports all aspects of operational Street Works. Passionate about helping others, he is committed to building on his previous experience in training and coaching teams who work on-site, ensuring safety and competence, and passing on his knowledge and experience to those entering the industry. He also supports organisations in improving and maintaining their levels of compliance.

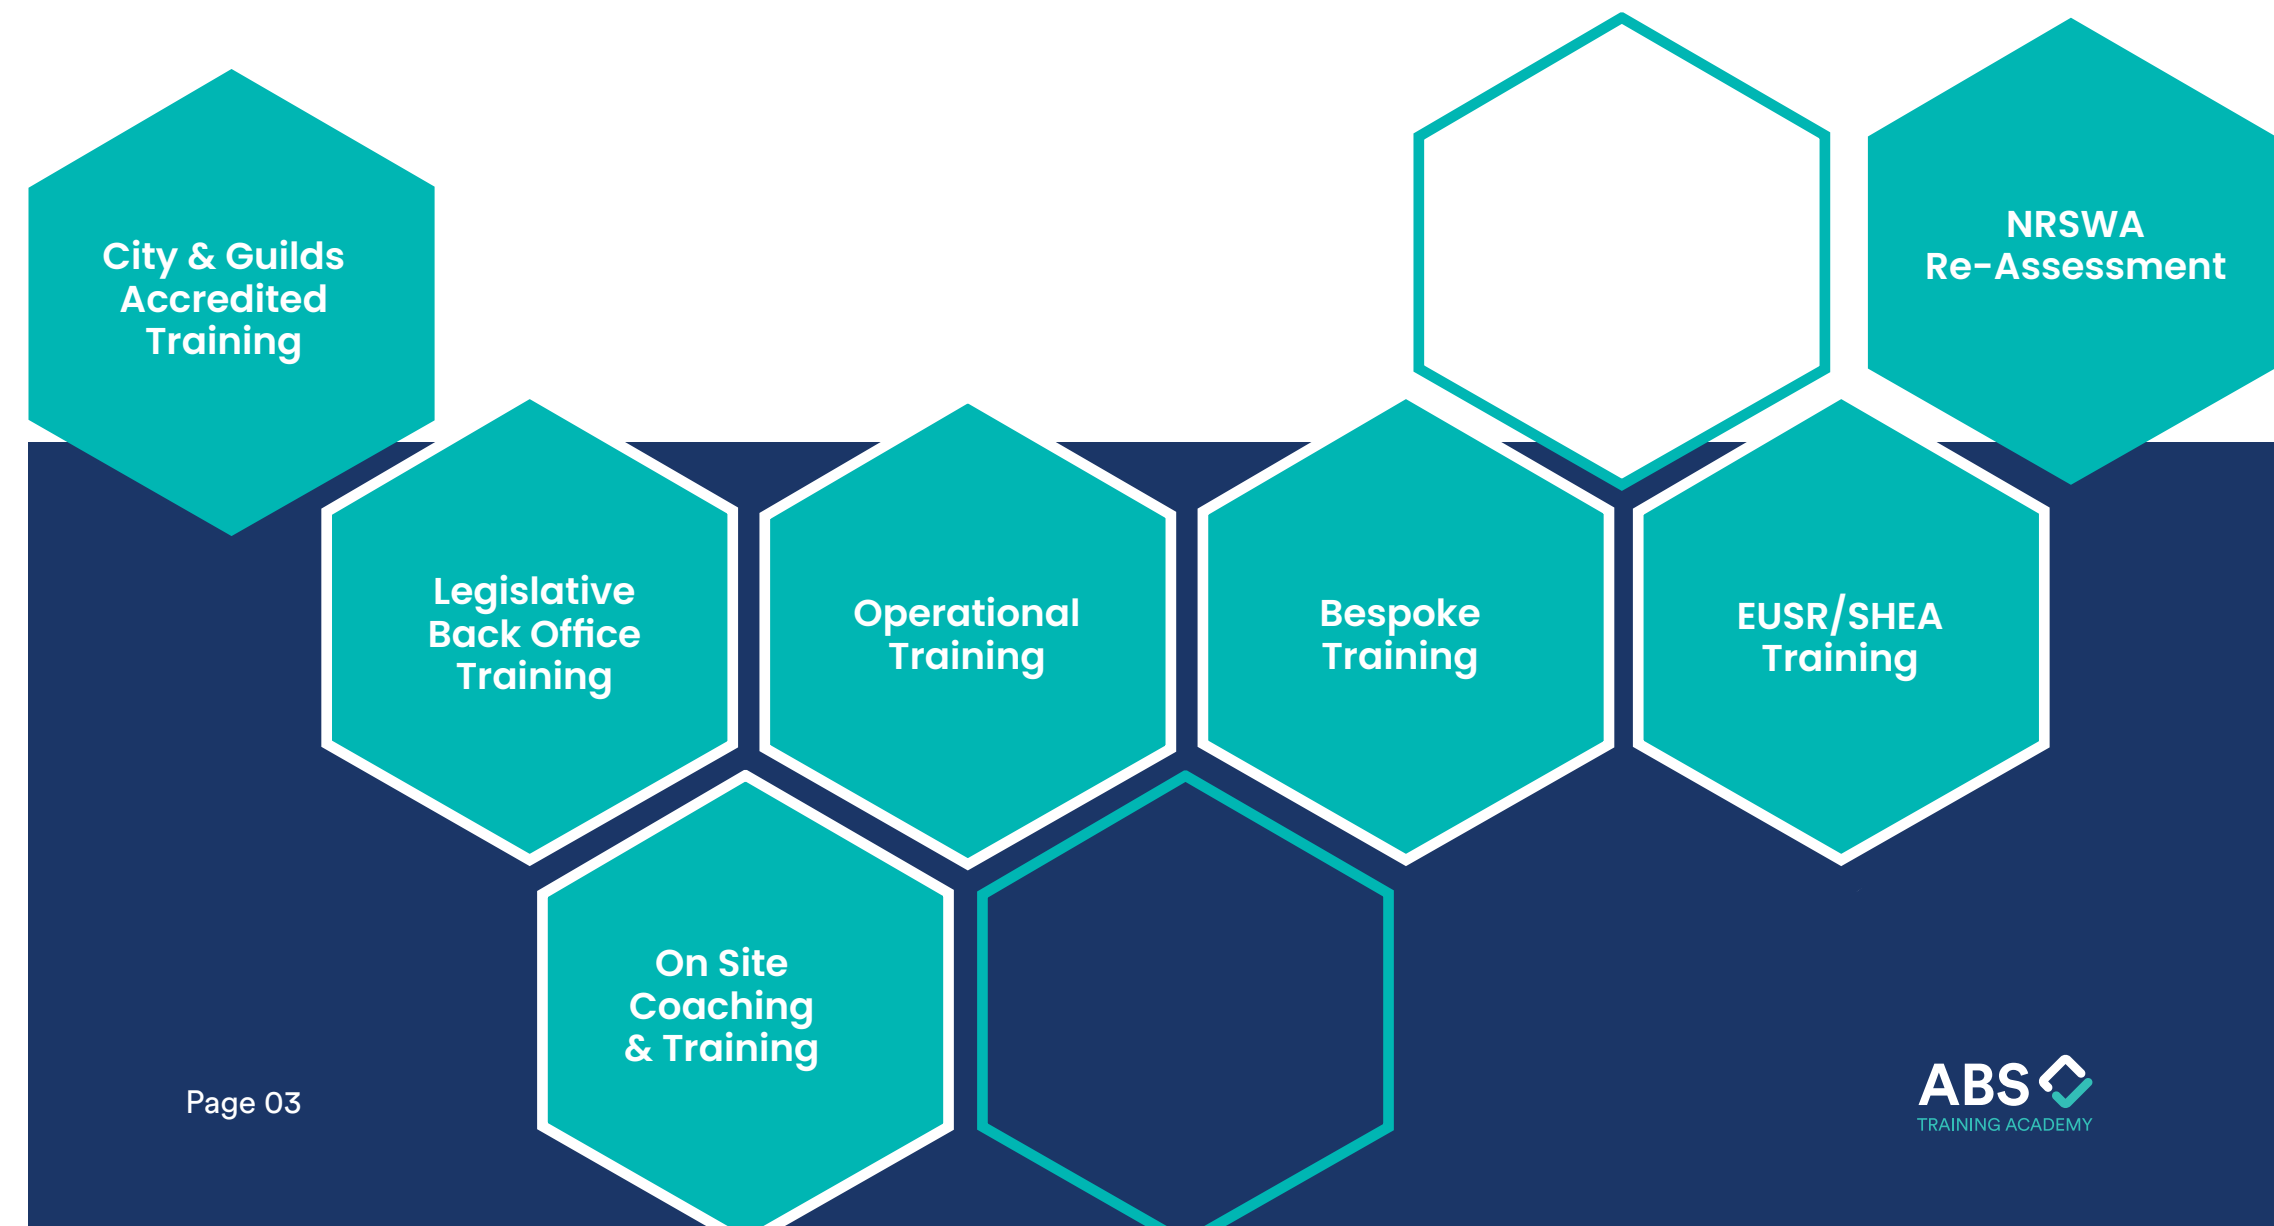

**Melanie Lee**  
Street Works Trainer    [melanie.lee@absstreetworks.co.uk](mailto:melanie.lee@absstreetworks.co.uk)

An experienced Street Works professional bringing over 22 years of experience in the utilities industry, working for both utilities and their partners across a wide range of Street Works operations, and collaborating closely with highway authorities. In her role, she is responsible for delivering our award-winning two-day City & Guilds Street Works Legislation and Administration Training, along with bespoke training tailored to specific needs.

She possesses a broad range of knowledge in Street Works, from administration and the application of legislation to the operations and management of Street Works and associated performance. Mel has leveraged this knowledge to align and support commercial elements, giving her a comprehensive end-to-end understanding of the impact of Street Works and all associated costs.

## Training Academy Core Products & Offerings

# Training

Our Training Academy allows our customers to invest in the knowledge of staff, both office & site-based. We provide:

- Legislative Training City & Guilds Accredited for back office and on-site teams
- EUSR / SHEA Training
- NRSWA Re-assessment in house & at Client offices
- On site Coaching & Training
- On site checks to identify Specific and tailored Training needs
- Bespoke Training specific to your needs & Requirements

## City & Guilds Street Works Administration and Legislation

Our Street Works Legislation & Administration training course provides an overview of relevant legislation alongside an in-depth understanding of codes of practice and inspections.

We support teams in their understanding and application of these codes and help organisations reduce the financial risk of non-compliance by educating and empowering teams to recognise their skills and knowledge.

At ABS, our experience is paramount across street works, from legislation and admin to on-site management and commercial opportunities.

“The trainer managed to turn what most would call a very dull subject into something interactive, tangible and interesting. Her expertise allowed her to tailor the information we were learning into something we can relate to our jobs. I found it very beneficial.”

## Street Works Development Programme Operations

The programme is aimed at all personnel who are involved in the day-to-day activities involved in the operational management and delivery of works in the highway, from pre-site through to final reinstatement and understanding and identifying failure, understanding fully and broadly the requirements that keep you legally compliant to the codes that govern our Street and Road Works.

Our Street Works development for operations can provide all those involved with a rounded knowledge and understanding of the legislation and legal requirements governing how those sites are managed, assessed, set-up, maintained, and a detailed understanding of the SROH and materials and methods required to support a high level of compliance. The unit approach allows you to choose the units you want for your learners and ABS will work with you to create the package you need be it materials focused, or safety. This promotes a culture of continuous development and commitment to maintaining the highest standard to safety and compliance within your teams or role.

## Street Works Development Programme Back Office

The programme is aimed at all personnel who are involved in the day to day administration and management of Street Works co-ordination, from planning through to processing defect failures, including the administration and management of the permit and notice requirements that keep you legally compliant to the codes that govern our Street and Road Works.

Our Street Works development for office based teams can provide schedulers, planners & Street Works administration staff, with a rounded knowledge and understanding of the legislation governing the works their operational teams carry out in line with the Code of Practice for Co-ordination of Street and Road Works and other relevant codes supporting that delivery. The unit approach allows you to choose the units you want for your learners and ABS will work with you to create the package you need. This promotes a culture of continuous development as people develop in their roles or move roles.

## On Site Coaching and Training

At ABS, we understand that the classroom environment doesn't suit everyone, and we will travel to those who need training, support, or a chance to get answers from an expert.

On-site coaching allows for an appropriate learning environment and provides the best scenarios for learning. It also enables us and the teams to further extend their learning as they engage in what they are doing and ask questions as they go along or move to other jobs.

Additionally, it allows our trainers to understand where processes and procedures, equipment, etc., could be improved to create efficiency and learning for each job, seeing the fullstart-to-end process.

## Bespoke Training

Whether you're seeking specialised expertise or a broad skill set, our training and trainers are designed and dedicated to elevate your knowledge and readiness.

Here at ABS Training Academy, we know that "one size" doesn't always fit all, and that's why we will work with you to develop a training course that fits your needs and requirements.

We can work with you to ensure that all new starters, existing staff, and new contracts are trained on both legislation and business requirements. We can ensure that the training is tailored to include business processes and systems.

Alternatively, we can simply ensure that any known performance issues are addressed within legislation training, and specific scenarios are tailored to your business needs.

The possibilities are endless...

# EUSR / SHEA

As part of the training offerings, we will be delivering the following SHEA modules along with your Blue Card Water Hygiene:

- Blue Card Water Hygiene
- SHEA Gas
- SHEA Water
- SHEA Telecoms
- SHEA Power

The EUSR National Water Hygiene Scheme covers issues such as health and hygiene awareness and contamination risks when working on clean water sites, water treatment plants, or works on the water network. Registration on this scheme is needed for access to the operational and restricted sites of all UK water companies.

Training can be delivered remotely, making it easy and convenient to access. The assessments are digital and will automatically tell you if you pass or fail on completion, meaning no waiting to find out.

This training is invaluable in keeping everyone safe and well.

# NRSWA Re-Assessment

Get booked on to our, certified CABWI Reassessment course – essential for anyone that wishes to continue to work on the roads, and whose current qualifications are due to or have recently expired!

Available as 1-2 or 2-3 day reassessments, the course can either be delivered at your place of work or at the ABS offices.

After successful completion of the training and assessment you will be awarded a new certificate from the awarding body, CABWI.

“Very nicely explained and articulated, very easy for the information to register & becomes easy to understand. Amazing. Highly recommended!”

# Don't Just Take Our Word For It...

Here's some of our client and learners feedback.

"Melanie did an amazing job at making the whole training session as interactive and as engaging as possible. I really enjoyed the interactive parts to ensure we were remembering and recapping key points and topics."

"Ken explained everything perfectly for me, I had a lot of questions as I do not work with TM a lot and he was patient with me."

"Melanie was brilliant, she is so knowledgeable & relatable!"

"We've all really enjoyed the training this week and they have all passed! Ken's knowledge and assistance has been first class with everyone who took the training and there has been plenty of positive comments throughout. We shall recommend both yourselves and Ken to anyone who is seeking additional training."

"Loved the presentation and the clear delivery of the subjects."

"Ken was informative but kept it fun and interesting, making you want to listen."

"Ken was brilliant and very friendly. He has lots of knowledge and is a great trainer."

"The trainer went away and created another piece that allowed us to understand it better, supporting everyone in the group."

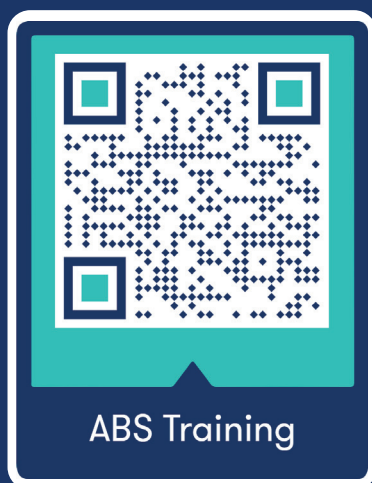

"Overall the whole training was engaging. I had some knowledge of Street Works and Street Manager beforehand, but the course has helped understand it better."

"When Ken was using photographs of real life examples to explain his points it made it a lot easier to understand what he was trying to explain."

"Amazing training, would want to do more."
